FOREWORD

The Department of Agriculture is pleased to bring out a publication comprising an inventory of released and de-notified crop varieties in Bhutan.

The primary objectives of this publication are to:

- Provide an update on improved varieties released from 1988 to 2023 along with their agronomic information.
- Provide basic information/data on all released varieties, which will serve as a useful reference for researchers, policy makers, regulatory authorities and crop genetic conservationists in the country.

With the addition of 28 new released crop varieties, the department takes pride in placing on record the release of 310 improved varieties of field and horticulture crops and 31 forage crops between the years 1988 and 2023, offering a comprehensive basket of technological choice to our growers. Till date, the Ministry of Agriculture & Livestock has released 59 field crops, 110 fruit plants, 128 vegetables crops, 6 plantation crop, 6 spices, 1 herb and 31 forage crop varieties.

As new varieties releases, the old and obsolete varieties are withdrawn from production in order to keep the number of varieties for seed production at a manageable level. Therefore, 37 varieties (27 vegetables, 9 field crops and 1 fruit crops) were de-notified between 1989 and 2015. Seed production of such de-notified varieties are discontinued.

Improved crop varieties are proposed by research centres and seed agencies to the Variety Release Committee (VRC). The VRC, based on the feasibility and potential of the crop, recommends the proposal and submit the list to the National Seed Board, which eventually and officially adopts and releases the crop variety.

The release of new improved crop varieties has huge potential to increase crop productivity. Hence, programs for introduction and development of new varieties should continue to support the growth of seed industry and ensure sustainable development in agriculture.

We earnestly acknowledge everyone involved for all the support and cooperation rendered for the publication of this document.

(Yonten Gyamtsho)
